

Carolina Sapphire Arizona Cypress

Bring elegance to your garden!
Thrives in dry, hot conditions.

Cupressus arizonica 'Carolina Sapphire'

- **Use:** Useful in landscape beds, islands and medians as screen, buffer, specimen, or in groups. Useful around the home or a building to frame the outside corners. Form is upright, broad and conical with weeping branchlets. An excellent selection to create a quick screen or buffer. Low maintenance, adaptable, and durable. Grows slightly taller, and a little faster than "Blue Ice". Slightly more erect growth habit than most Arizona Cypress. Very beautiful specimen tree for those who want something a little different and out of the ordinary. Developed by Clemson University.
- **Exposure/Soil:** Full to part sun. During the winter they prefer well-drained soils. Once established needs only occasional water.
- **Growth:** A super-fast grower moderate to 30' tall and 10-15' wide. Conical, broadly pyramidal growing conifer.
- **Hardiness:** 7-9 Shrub
- **Foliage:** Outstanding attractive blue-green foliage. Evergreen
- **Flower:** Small cones.
