

Silver Smoke Arizona Cypress

**Bring
elegance
to your
garden!
Thrives
in dry,
hot con-
ditions.**

***Cupressus arizonica glabra* 'Silver Smoke'**

- **Use:** A fine selection for use in privacy screen plantings, as a specimen anywhere in the sunny landscape, or as a corner plant to frame tall homes or other structures. Useful around the home or a building to frame the outside corners. Form is upright, broad and conical with weeping branchlets. An excellent selection to create a quick screen or buffer. Low maintenance, adaptable, and durable. The habit and form is similar to others in the genus but the color of Silver Smoke leaves all others in the smoke!
- **Exposure/Soil:** Full to part sun. During the winter they prefer well-drained soils. Once established needs only occasional water.
- **Growth:** A super-fast grower moderate to 20-30'(possibly up to 50' over long time) tall and 8-10' wide. Conical, broadly pyramidal growing conifer.
- **Hardiness:** 7-9 Shrub
- **Foliage:** **Evergreen** Outstanding attractive blue-green foliage. The foliage produces the illusion of smoke against its reddish brown, peeling bark.
- **Flower:** Small cones.
