

Starblast Chiffon® Rose of Sharon

Summer to fall color for hedges, perennial or shrub borders, specimen and containers. This is a nice addition to the mixed border, and can also be used as a specimen plant for late summer interest. Excellent for hedging.

Hibiscus (Althea) syriacus 'Rwoods6' PP30270

- **Use:** A stellar plant with large, pure white flowers artistically inked with outwardly radiating red and pink veins to create a festive flower unlike any other. The flowering starts early and continues on much longer than others. Another instant classic from the inimitable Dr. Roderick Woods! Easy to maintain in perennial borders and mixed beds.
- **Exposure/Soil:** Grow in full sun in ordinary soil. To increase bloom and to shape, prune to 2 buds per branch when dormant. Prefers to be watered under the leaves.
- **Growth:** Reaches 8 to 12 ft. tall and 5 to 8 ft. wide. It has the same mostly rounded habit as the other members of the Chiffon® series, perfect for using in a border or as a specimen.
- **Hardiness:** Zone 5-9 Shrub; Very heat tolerant!
- **Foliage:** Deciduous; Medium green maple-like leaves.
- **Flower:** Flowering earlier and for longer than many other varieties, Starblast Chiffon® rose of Sharon is the hero of the garden. Each of its brilliant white flowers has a fluffy doubled center, highlighted by a dramatic hot pink starburst center.
