

Flowerful™ Smooth Hydrangea

FIRST
EDITIONS
SHRUBS & TREES

Plant Natives

- Produces two-to-three times more blooms per season than other *Hydrangea arborescens*.
- Features strong stems that don't flop in the wind and rain, holding the bold blooms tall all season.
- Disease-resistant, lush foliage that stays clean late in the season, providing wonderful contrast to the blooms.

Hydrangea arborescens 'BAful'

- **Use:** "They're introducing another hydrangea?" We've heard it, and we get it. The goal is not to flood the market with "just another hydrangea." First Editions® will only introduce a new variety that truly provides a unique attribute. And this first foray into *Hydrangea arborescens* does just that. FlowerFull™ Smooth Hydrangea solves the frustrations of weak stems and foliar diseases, providing better genetics from the greenhouse to the garden.
- **Exposure/Soil:** Plant in a mainly sunny (but give them a break from 2-5pm sun is best in the South) They can tolerate full sun up North, but here in the South will see leaf burn in late summer if given all day sun. Prefers well-drained soil, but keep moderately watered. Prune in late winter or early spring. Soil pH does not affect flower color.
- **Growth:** Fast-growing to 3-4 feet high; and 4-5' wide in only 3 –4 years.
- **Hardiness:** Zone 3-9 Shrub
- **Foliage:** Deciduous. Coarsely toothed, glossy, dark-green leaves.
- **Flower:** Massive flowers bloom in summer, and are held up by very sturdy stems. Flowers open green, then mature to white before turning green at the end of their life cycle. Good for cut flowers. This cultivar boasts 2-3 times more flowers than any other *Hydrangea arborescens*.
