

Bloomstruck Hydrangea

**A must
have for
every
garden!**

Hydrangea macrophylla 'Bloomstruck'

- **Use:** Another great feature of BloomStruck and this collection is the ability to change the blooms' color. Incredibly beautiful red-purple stems, dark green leaves with red petioles and red veins, which give great contrast to your other garden shrubs, perennials and annuals. Because of BloomStruck's extremely strong stems, above average heat tolerance and great disease resistance - especially to powdery mildew - it is a perfect combination of beauty and hardiness for your garden!
- **Exposure/Soil:** Partial sun is best. **DO NOT PLANT IN FULL SUN!** (In full sun they wilt constantly in our hot summer heat and leaf burn) Water regularly, when top 3 in. of soil is dry. Keep water off leaves. Depending on soil pH, you can have vivid rose-pink or purple hydrangea flower heads.
- **Growth:** Fast-growing to 3-4 feet high; 4-5' width in only 4 years.
- **Hardiness:** 5-9 Shrub
- **Foliage:** Deciduous. Large leaves offer a lush backdrop for the showy blossoms **AND TURN BURGUNDY RED IN FALL.**
- **Flower:** Blooms mature to shades of purple or rosy red (depending on soil pH) extending the display into fall.
