

Blushing Bride Hydrangea

**A must have for
every garden!**

Hydrangea macrophylla 'Blushing Bride'

- **Use:** Endless Summer® marked a breakthrough in Bigleaf Hydrangeas by flowering in spring on old wood and then in summer on new wood. Now we introduce its white-flowered sibling with the same dark green leaves and 9in flowers, but earlier rebloom. The flowers of 'Blushing Bride' age to blush or pale sky blue depending on the pH of your soil.
- **Exposure/Soil:** Partial sun. Water regularly, when top 3 in. of soil is dry. Keep water off leaves. **DO NOT PLANT IN FULL SUN!**
- **Growth:** Fast-growing to 4-5 feet high; equal width in only 4 years.
- **Hardiness:** 5-9 Shrub
- **Foliage:** Deciduous. Large leaves offer a lush backdrop for the showy blossoms.
- **Flower:** Pure white blooms with semi-double florets gradually mature to a sweet, pink blush or sky blue depending on the soil pH. Can bloom for more than six months in warm areas.
