Hydrangea macrophylla 'Let's Dance Sky View'

- **Use:** Let's Dance Sky View big leaf hydrangea (*H. macrophylla*) is a standout for consistent, yearly blooming, whether you grow it in the North or South. Selected from our extensive Let's Dance® hydrangea breeding program for its ability to not only conserve its old wood buds in the face of weather challenges, but also its ability to continue creating new flowers. You'll also love how easy this cultivar is to turn blue, which is what we recommend, since it's so spectacular this way: flowers emerge a beautiful sky blue with a honeydew-green eye before maturing to a full sky blue. Its nice compact growing habit makes it both a good container and garden plant.
- **Exposure/Soil:** Partial (60-70% of the day) sun is best. Water regularly, when top 3 in. of soil is dry. Keep water off leaves. **DO NOT PLANT IN FULL SUN!** in the South or you will get leaf burn in August and it will wilt on hot days. Large, full flower heads will readily go heavenly blue in acid soils; in alkaline soils, they'll be vivid pink.
- **Growth:** Fast-growing to 2-3 feet high; equal width in only 4 years. Cannot be pruned at any point in the year without negatively impacting the flowering. As such, it's best to avoid pruning this hydrangea altogether. If portions of the plant were damaged from winter weather, they can be removed in spring when it is clear where the new growth is emerging.
- **Hardiness:** Zone 4a-9b Shrub
- **Foliage:** Deciduous. Large heart shaped leaves.
- **Flower:** You'll also love how easy this cultivar is to turn blue, which is what we recommend since it's so spectacular this way: flowers emerge a beautiful soft blue with a honeydew-green eye before maturing to a full sky blue. Blooms on new and old wood.

**A must
have for
