

Glow Pop® Japanese Holly

With a low mounded habit, it makes a fabulous low hedge, edging, or container plant.

***Ilex crenata* 'NCIC1' USPPAF**

- **Use:** Every garden needs a bright spot. Glow Pop® holly is the perfect candidate! It grows naturally as a compact, tidy ball. Its lime green coloring is nearly fluorescent and doesn't burn in the sun. It's a great fit for the front of the border, where it will grow to maturity quickly and fill the space in fast. Excellent for foundation plantings and rock gardens and requires no pruning.
- **Exposure/Soil:** Full sun to part shade. Use slow release fertilizer for best results. Water if it hasn't rained in 2 weeks.
- **Growth:** Grows 2-3' tall and wide in a tidy habit.
- **Hardiness:** Zone 6a-9b, Shrub
- **Foliage:** Evergreen. Foliage is a vibrant yellow in full sun and more subdued in shade, but adds a pop of color to your garden. Will not burn in full sun.
- **Flower:** Not known for flowers. Small, black berries not very visible in winter.
