

Hetzii Juniper Globe Topiary

Very easy with minimal care in sun, but they do need some weekly water.

Please do not buy unless you have them on a drip irrigation going off weekly if it doesn't rain.

Juniperus chinensis 'Hetzii'

- **Use:** Easily adapts to specially-trained topiary shapes. Please be aware they are difficult to grow in planters at the front door unless they are on an irrigation system. We recommend you plant them in the ground if you do not have the pots on an irrigation system.
- **Exposure/Soil:** Prefers full sun to part sun. Water regularly, when top 3 in. of soil is dry to start. Little water needed once established.
- **Growth:** Fast-growing to 15 feet high, 5 feet wide. To maintain the compact globe you will need to lightly shear them every other month in spring and summer when actively growing.
- **Hardiness:** Zone 4-9, Shrub
- **Foliage:** Evergreen. Dense green foliage gives this selection a handsome appearance.
- **Flower:** No noticeable flowers.
