

# Good Vibrations Juniper

## *Juniperus horizontalis* 'Good Vibrations'

- **Use:** If you're a "good vibes only" type of gardener, this is the ever-green for you!
- Good Vibrations® Gold juniper lights up the landscape with glowing gold foliage - and unlike other junipers, no prickly disposition. This one is soft to the touch! It's naturally low growing and spreading, making it a perfect durable, deer resistant, drought tolerant groundcover or edging plant. It loves sunny, dry spots, allowing you to transform those tricky areas into an oasis of color and beauty. This North American native is both supremely hardy and heat tolerant.
- **Exposure/Soil:** Prefers full sun to part sun. Water regularly, when top 3 in. of soil is dry to start. Little water needed once established.
- **Growth:** Moderate growth 12– 18" tall, spreading 7-9' wide.
- **Hardiness:** Zone 3a-9b, Shrub
- **Foliage:** Evergreen. Unlike any other juniper: it's soft to the touch and provides dynamic, seasonal color changes. In the spring it emerges an attractive chartreuse hue, changes to bright yellow, then takes on orange hues in the autumn.
- **Flower:** No noticeable flowers.

### Top reasons to grow Good Vibrations Gold

#### juniper:

- Colorful foliage is glowing gold during the growing season, appealing orange-purple in autumn.
- Very resistant to drought and deer.
- Thrives in both very hot and very cold areas.
