

Fragrant Princess Tea Olive

FRAGRANT!

**Can be used as a
Bonsai or great in
pots!**

Osmanthus heterophyllus 'Kaori Hime'

- **Use:** This has to be one of the most incredible new introductions of this species in recent memory. (Nurseries Caroliniana) "We found this cultivar in Japan in November, 2009 and the parent plant was in full flower". The leaves are typical of this species, but are only 3/8" long. Ideal for a rock garden or very confined spaces or even as a container plant.
- **Exposure/Soil:** Prefers full sun to part sun. Water regularly, when top 3 in. of soil is dry.
- **Growth:** Super compact at 1-2 tall and wide.
- **Hardiness:** **Zone** 6-10; Shrub
- **Foliage:** Evergreen shrub with broad upright growth and has dark green finely toothed foliage.
- **Flower:** The most remarkable thing about it is that it will flower when only a few inches tall. Many plants this dwarf rarely flower, if ever, but the flowers are full size, so they put on quite a show and are just as fragrant as the species.
