

Alouette™ Ninebark

FEATURES

- NATIVE
- WHITE FLOWERS.
- BRONZE-MAROON FOLIAGE.
- VERY HARDY.
- ***Physocarpus opulifolius 'Couriphy01' PP28793***
- **Use:** A super-tough, easy-care and fast-growing selection of our North American native species, the Alouette Ninebark features an upright rounded shrub to around 6 feet tall and wide clothed in very unique and attractive maple-like leaves in shades of copper, orange and golden shades. In late spring to early summer abundant domed clusters of contrasting white flowers appear that are followed by bright red seed heads. The flowers Layers of peeling red-brown bark on the branches and stems, hence the name "ninebark," take the stage during the winter months. A trouble-free and colorful beauty that deserves a spot in every landscape where it will grow.
- **Exposure/Soil:** Full sun to part sun; moist, well drained soil; dislikes wet sites. Water regularly, when top 3 in. of soil is dry.
- **Growth:** Moderate growing; reaches 5-6' tall and 5-6' wide.
- **Hardiness:** Zones 4a-8b; Shrub (needs protection from heat in zone 8
- **Foliage:** Deciduous. A warm mix of copper, gold and orange foliage. Young foliage will show the distinct three-tone coloration.
- **Flower:** Flat-topped, cluster of white flowers in late summer. Reddish fruit in fall maturing to brown.
