

White Indian Hawthorne

Rhaphiolepis 'Snowcap' x delacourii 'Corleyscourii'

- **Use:** A compact, mounded evergreen with large, dark green, highly disease-resistant foliage that changes to a dramatic, burgundy-red in cold weather. Clusters of pink buds open to pale pink flowers which fade to white, followed by small, blue-black, ornamental fruit. An excellent hedge, accent, or foundation plant for low maintenance landscapes.
- **Exposure/Soil:** Full-part sun. Water regularly, when top 3 in. of soil is dry. Use slow release fertilizer two times a year. Fairly drought tolerant. They do not like sprinklers, if you must use a sprinkler do so only in the morning. They prefer dry leaves.
- **Growth:** Moderate growing; reaches 4 ft. tall and wide.
- **Hardiness:** Zone 7-10, Shrub
- **Foliage:** Evergreen New growth is red, maturing into a dark green color. Good leaf spot resistance.
- **Flower:** Fragrant, snowy-white flower clusters bloom in the spring and early summer, followed by dark, blue-black berries.
