

Jeb Stuart Rhododendron

**This fragrant
beauty is hard
to find and heat
tolerant!**

Rhododendron 'Jeb Stuart'

- **Use:** The Confederate Series of deciduous azaleas was introduced by Dodd & Dodd Nurseries, Semmes, Alabama. An excellent large-flowered Exbury Azalea was crossed with the heat-tolerant, native Florida Azalea, *R. austrinum*, and the results are large-flowered, fragrant, heat tolerant cultivars.
- **Exposure/Soil:** Part sun to shade. As with other azaleas, the partial shade of tall trees overhead is the ideal. It will adapt to full-sun sites, though. You just need to water it during times when it isn't raining enough. Grows best in moist, **well-drained**, organic soils with a pH range from 4.5 to 6.0. "**Well-drained**" is the key. Planting it in places that don't drain well is a sure death sentence.
- **Growth:** Habit is upright and bushy. Grows 10-12' tall and 4-6' wide.
- **Hardiness:** Zone 5-9 Shrub
- **Foliage:** Deciduous. Very lustrous dark green leaves turn orange-bronze in fall. The handsome leaves are exceptionally mildew free.
- **Flower:** The plant bears beautiful medium pink-flowers with a yellow flag. Later season bloomer.
