

Duet Rose Tree

**A strong
and
relatively
disease
resistant
rose!**

Rosa sp. 'Iceberg White & Burgundy'

- **Use:** What could possibly compare with the sight of brilliantly-blooming roses in your yard, shimmering in the summer sun as they cast a spicy-sweet scent upon the afternoon breeze! The only thing that could add to this majestic picture is having those roses appear, not on the traditional bush, but rather in the unique form of a tree.
- **Exposure/Soil:** Prefers full sun to part sun. Water regularly, when top 3 in. of soil is dry to start. Roses hate water on the leaves.
- **Growth:** Moderate grower to 3-4' tall and wide
- **Hardiness:** **Zone** 5-9, Shrub
- **Foliage:** Deciduous; Dark green glossy foliage.
- **Flower:** It is sure to amaze you with its prolific bloom of ruffled, pristine white and burgundy roses, each with a slight flush of yellow at its center. The 2 to 4 inch blossoms feature a petal count of 40, and appear in clusters amid. A delicate fragrance is another advantage of this remarkable rose variety, with a scent that is not too strong or sweet, but has just the right spicy-honeyed scent for drawing beneficial pollinators to your yard.
