

White Knockout Rose

Rosa x 'Radwhite'

- **Use:** Tirelessly floriferous, its blooms complementing every other color in the garden. From the same breeder as the remarkable Pink and Red Knock Outs that we love so much. This handsome 'White Out' has masses of single, simple blooms, with the vigor and disease resistance of modern hybrids. No more mildew, rust, or Japanese beetles to decimate the foliage by midsummer! Very free-blooming and determined to repeat from late spring until frost, White Out is a glorious addition to any garden.
- **Exposure/Soil:** It blooms best in full sunshine and prefers well drained soil. Clay soil must be amended and drainage improved.
- **Growth:** Rounded, bushy and well-behaved shrub, fast growing 3 to 4 ft. high and wide.
- **Hardiness:** 5-10 Shrub
- **Foliage:** Deciduous. The foliage is exceptional as well, a very dark shade of green that looks almost charcoal from a distance. The play of black-and-white is very effective over the long bloom season creating a dramatic impact in the border, as a hedge, or in containers. Terrific resistance to mildew, rust, and Japanese beetles, these leaves keep their beauty far longer than many other Roses — without spraying!
- **Flower:** Measuring 3 to 3 1/2 inches wide, these snowy blooms delight with their frilly yellow center and large, overlapping petals. They begin blooming in late spring, continuing in great waves through summer and autumn, only ceasing when the first frost nips them back. Self-cleaning with a slightly citrusy fragrance, they evoke freshness in the garden.

**The best white rose on the market!
Thrives in humid climates and
requires little spray and maintenance.**
