

Limoncello Rose

Continuous Bloom or Rebloomer/ Long blooming/No Deadheading

Rosa x 'Limoncello'

- **Use:** The continuous blooms cover the tidy mound of dark, glossy foliage. This is a wonderful choice for mass plantings or adding unusual color to mixed borders. Superior disease-resistance makes it easy for gardeners to enjoy. This variety rebels against the idea that roses are hard to grow! Because of its summer-long flowering performance and its excellent disease resistance, Limoncello™ is an excellent choice for large landscape plantings.
- **Exposure/Soil:** Full to part sun. During the winter they prefer well-drained soils. Water regularly, when top 3 in. of soil is dry.
- **Growth:** Grows 3' tall and 6' wide.
- **Hardiness:** Zone 6-9; Shrub
- **Foliage:** Deciduous. Unsurpassed resistance to black spot leaf disease.
- **Flower:** Produces clear yellow flowers prolifically all summer, over dark green disease resistant foliage. The 3" blooms are single and very fragrant. This is the first strong yellow bloomer from the Meidiland® breeding program in France, introduced into the US by Star Roses.
