

# Princess Anne Rose

## *Rosa 'Princess Anne'*

- **Use:** The young flowers are deep pink, almost red, fading to pure rich pink. The rather narrow petals are unusually substantial, with a hint of yellow on their undersides. Held in large, fragrant clusters, they are produced with remarkable freedom. A particularly healthy variety; it forms a bushy, upright shrub with thick, succulent, highly polished foliage. Named for Her Royal Highness, the Princess Royal.
- **Exposure/Soil:** Full preferred. They must have well-drained soils, so if you have red clay you must amend it. Water regularly, when top 3 in. of soil is dry. Keep water off the leaves (no sprinklers/ don't water leaves.)
- **Growth:** Grows to 4' tall and 4.5' wide.
- **Hardiness:** Zone 5-11, Shrub
- **Foliage:** Deciduous. Foliage is dark green and disease resistant.
- **Flower:** Flowers are deep pink, almost red, with 85 petals, and features clustered blooms with a tea rose fragrance. She blooms in flushes throughout the season with narrow petals and a hint of yellow on the underside. Excellent repeat flowering.
