

Double Doozie Spirea

Top reasons to grow Double Play Doozie® spirea:
- Non-invasive! Sets no seed so won't spread into the wild.
- Blooms non-stop - all the energy it would spend developing seed

Spiraea japonica 'Double Play Double Doozie'

- **Use:** *This spirea is better than great - it's a doozie!*
- Spirea is an old landscape staple, so what could one do that could possibly earn it superlatives? Well, seedless and non-invasive would be a start; non-stop blooming would be even better. And these are exactly what makes Double Play Doozie spirea the most beautiful, innovative, ground-breaking spirea to ever grace a landscape. Like all of the Double Play® spirea series, the show begins in early spring, when the foliage emerges in blazing brilliant color - in this case, deep red. By late spring, the flowers begin to emerge, a bright, glowing purple-red that truly sings in the landscape. And as summer comes on, the show doesn't stop: it just keeps flowering, and flowering, and flowering. All the drought tolerance, and deer resistance that you expect from spirea, too.
- **Exposure/Soil:** Full- part sun. Water regularly, when top 3 in. of soil is dry. Drought tolerant once established
- **Growth:** Fast growing to 2-3' tall and wide. It naturally takes on a nice, rounded habit without pruning. If you wish, you can give it a trim after the flowers fade, which will encourage even more colorful new growth.
- **Hardiness:** Zone 4 -8; Shrub
- **Foliage:** Deciduous. The foliage is also something worth noting. In the spring the bronze red foliage shines, as the temperatures warm up the foliage takes on a light green color. The new growth emerges burgundy in color, giving the tips a nice color contrast.
- **Flower:** Enjoy pink-red blooms from late spring-fall frost.
