

3 gal Bloomerang Lilac

Reblooming lilac blooms from spring and again from mid-summer to frost. Small habit fits into any garden. Good for cutting. Fragrant. Deer resistant.

\$15.00

Syringa x 'Bloomerang' ('Penda')

- **Use:** Enjoy classic lilac fragrance for months instead of weeks! A revolutionary new kind of lilac, Bloomerang blooms in spring and then again throughout the summer. It does go through a rest period in the heat of the summer, then flowers. While traditional lilac varieties bloom for a few short weeks in spring, Bloomerang's fragrant flowers continue until frost. This compact, mounded variety fits easily into any landscape, and is ideal as a foundation planting or as part of the mixed border. You can even include it into perennial beds.
- **Exposure/Soil:** Requires well-drained soil and full sun. Remove spent blooms promptly to encourage reblooming. Prune to shape after blooming. Flower production may decline during extremely hot summers but will resume when temperatures cool in fall. Apply a controlled release fertilizer in the spring. This variety has good powdery mildew resistance. **MUST HAVE GOOD DRAINAGE! NO RED CLAY!**
- **Growth:** Fast-growing to 4-5 feet high; equal width in only 3 –4 years.
- **Hardiness:** 4-9 Shrub
- **Foliage:** Deciduous. Small, glossy, dark-green leaves.
- **Flower:** Summer flowers open soft green and turn pink and burgundy in fall. The autumn display of chartreuse and pink blooms on the same plant is breathtaking!
