

Montague Cleyera

Loved for its reddish new growth!
A common replacement for Red
Tip.

Ternstroemia gymnanthera 'BLTG01'

- **Use:** This versatile evergreen shrub is no tragic figure in the garden. Its upright habit and bronze/maroon new growth that matures to deep green impart classic good looks to the landscape. Beautiful, leathery leaves look as though they've been polished! Attractive, basic landscaping shrub, informal hedge or container plant.
- **Exposure/Soil:** *Full to partial sun.* Prefers well-draining soil and appreciates slow release fertilizer. Water when top 3 in of soil is dry.
- **Growth:** Moderate grower to 6 to 7 ft. tall and 3 to 4ft, maybe larger with age. Easily kept shorter however with pruning.
- **Hardiness:** Zone 7a-10b; Shrub or Houseplant. We recommend you plant them on a protected wall away from extreme winter cold for best success.
- **Foliage:** Evergreen; Bronze-maroon new growth matures to deep green.
- **Flowers:** Not known for flowers or fruit.
