

# Lemon Burst Arborvitae

## *Thuja occidentalis* 'Lemon Burst'

It can be clipped into formal shapes or a hedge – or left to develop its own character as a rounded/pyramidal, dense, upright evergreen. It has no significant pests or diseases, and this plant is easily grown by anyone, yet it is eye-catching and vibrant in every garden. Rich foliage colors bring warmth and interest to the simplest garden.

- **Use:** Lemon Burst® Arborvitae is moderately sized with broadly conical form and tight habit. This evergreen thrives in warm climates, does equally well in cold climates, and is resistant to Paspalora/Cercospora needle blight. Yellow new growth keeps its color even when grown in full sun. In cool climates during winter, the foliage takes on lovely orange tones. Lemon Burst® is a great choice for year-round color and stunning winter interest.
- **Exposure/Soil:** Full to part sun. During the winter they prefer well-drained soils. Water regularly, when top 3 in. of soil is dry. Once established needs only occasional water.
- **Growth:** Grows at a moderate rate in a broad-pyramidal form 4-6' tall and 3-4' wide.
- **Hardiness:** Zone 4-8; Shrub; May need some protection from summer heat. Location will be key on this specimen.
- **Foliage:** Evergreen. Lemon yellow foliage in spring that deepens to orange yellow in winter.
- **Flower:** Not known for flowers..
