

Berkman's Golden Arborvitae

Very easy to grow! Best used as a specimen plant. Or can be used as a grouping plant.

Thuja orientalis 'Berkman's Golden'

- **Use:** A semi-dwarf arborvitae with light greenish-yellow, fernlike vertical sprays which are all tipped in yellow-gold. Semi globose to oval growth habit with very profuse cone production. Very little bronzing in the winter makes this arb a very good choice for a medium to large size hedge or border plant when planted approx. 3ft apart. Very popular variety - especially well suited for the heat & humidity of the south & southeast.
- **Exposure/Soil:** Full sun; well-draining soil and appreciates slow release fertilizer. Little water needed once established.
- **Growth:** Moderate growth to 6 ft. tall, 3-4 ft. wide.
- **Hardiness:** Zone 5-9; shrub
- **Foliage:** Evergreen. Deep blue-green foliage.
- **Flowers:** No noticeable flowers.
