

Forever Goldy Arborvitae

Perfect for the background in your flowerbeds or at the corner of your home.

Thuja plicata '4EVER' PP19267

- **Use:** I'm great for a pop of color in narrow spaces. This "ever golden" compact shrub grows quickly into a stunning display of gold-yellow foliage that will not shed. Both heat and drought -tolerant. Excellent for planting in a container on the patio, or at the back of a border.
- **Exposure/Soil:** Full(best foliage color) to part sun. During the winter they prefer well-drained soils. Water regularly, when top 3 in. of soil is dry. Once established needs only occasional water.
- **Growth:** Mature size is 10-12 ft tall, 3-4' wide,
- **Hardiness:** Zone 5 –8; Shrub /Small tree.
- **Foliage:** Evergreen. Aptly named because it doesn't sunburn or fade from its bright yellow hue. Its intense pop of color helps it stand out in the landscape among other evergreens.
- **Flower:** Not known for flowers..
