

My Monet Purple Effect® Weigelia

Weigelia florida 'Verweig8' PP30064

- **Use: New energy for an old favorite!** My Monet Purple Effect™ brings new color, more flowers, and better adaptability, while sharing all the charm and beauty of the original My Monet® weigelia. Its variegated cream and mint green foliage takes on purple (as opposed to pink) tones, and it is much better able to withstand the rigors of both cold and warmer climates. Though it is slightly larger, it can be used in much the same way: as a delightful companion to perennials, as a colorful edging, in a container, or anywhere you need a spot of clear, clean color.
- **Exposure/Soil:** Full/part sun; well-draining soil and appreciates slow release fertilizer.
- **Growth:** Moderate grower to 18-30" tall and wide.
- **Hardiness:** Zone 4a-6; Shrub Better suited to cooler climates.
- **Foliage:** Deciduous. Neat, variegated foliage. The foliage looks good right up until frost, giving new energy to this long-time favorite.
- **Flowers:** Breathtaking plum purple to pink flowers that bloom in the late spring. They are petite flowers, but the abundant amount and captivating colors ensure that they don't go unnoticed! Often reblooming throughout the summer sporadically, you'll get a second burst of color later in the growing season!
