

Manyo No Sato Japanese Maple

The striking variegated leaves with very deeply divided lobes emerge dark shades of purple to purple-red edged in lime green in spring, changing to mauve-red with green trim in summer when in part shade, or more green in full sun.

Acer palmatum 'Manyo No Sato'

- **Use:** High heat tolerance and unique coloration make Manyo No Sato an easy choice for those looking to add an unusually beautiful conversation piece to their garden. Japanese maples are highly desirable for their stunning year-round color, compact size, and versatile, sculptural forms that fit well in small gardens or containers.
- **Exposure/Soil:** Prefers full sun to part sun. Morning sun with protection from hot sun is best in the South. Water regularly, when top 3 in. of soil is dry. Will not tolerate soggy or extremely dry soil.
- **Growth:** Slow growth rate of 6-8' tall and 4-6' wide in 10 years. Broad upright habit.
- **Hardiness:** Zone 5-10, Small sized tree
- **Foliage:** Deciduous. Narrow-lobed, deeply divided leaves emerge purple, and harden off to green and purple. In late summer, the purple turns deep green, creating a two-toned green effect. Fall color is purple and orange.
- **Flower:** Distinctive double-winged, papery samaras (seed pods), often in bright red, which emerge in spring before leaves and mature for wind dispersal.
