

Cherry Dazzle Crape Myrtle

Lagerstroemia indica 'Cherry Dazzle'

- **Use:** A dazzling show of color that begins with bronze new leaves that mature to dark green, followed by masses of brilliant red flowers, and finally fall foliage that changes to a vibrant red-purple. Its compact habit and disease resistant foliage means easier care in shrub borders. Drought tolerant when established. From our local plant celebrity Michael Dirr of UGA.
- **Exposure/Soil:** Full/part sun; well-draining soil and appreciates slow release fertilizer. Water regularly. They tolerate clay and alkaline soil well. Prefers not to have water on the leaves.
- **Growth:** Slow growing; reaches 3 to 5 ft. tall and wide.
- **Hardiness:** **Zone** 7-10; Shrub
- **Foliage:** Deciduous. Excellent mildew and disease resistance.
- **Flowers:** Cherry red blooms from summer into fall.

Heat loving small bush with lots of color!
