

Infiniti Purple Crape Myrtle

It makes a great foundation planting, providing interest all year, whether from foliage, flowers or bark.

Lagerstroemia indica 'Infiniti Purple'

- **Use:** The brightest purple yet. Every summer, it lights up with vivid purple blooms, which continue through frost. Like the other plants in the Infiniti® series, this is a low growing dwarf variety, which opens up lots of possibilities for planting in landscapes and gardens.
- **Exposure/Soil:** Full/part sun; well-draining soil and appreciates slow release fertilizer. Water regularly. They tolerate clay and alkaline soil well. Prefers not to have water on the leaves.
- **Growth:** Grows quickly 3-5' tall and 3-5' wide. Dwarf habit gives that this plant has a wide range of landscape applications. It's a very nice addition to flower gardens as well as landscapes.
- **Hardiness:** Zone 6-12; Shrub
- **Foliage:** Deciduous. Glossy green foliage. Offers excellent fall color.
- **Flowers:** Vivid purple blossoms on a compact plant that's superb for smaller spaces. The flower show begins in summer and carries straight on into fall. Make sure you plant this where it can be seen and enjoyed. There will be jealous admirers.
