

Moonlight Magic Crape Myrtle

Heat loving small tree or large shrub with lots of color!

Lagerstroemia indica 'Moonlight Magic'

- **Use:** Beautiful purple-maroon foliage that holds its color through summer heat. Bright white blooms provide sharp contrast from the foliage in late July and August. Like our other dark leaf Magic™ crapes, Moonlight Magic™ is Cercospora resistant and an excellent problem-free replacement for purple leaf plums in areas where plums are defoliated by August.
- **Exposure/Soil:** Full/part sun; well-draining soil and appreciates slow release fertilizer. Water regularly. They tolerate clay and alkaline soil well. Prefers not to have water on the leaves.
- **Growth:** Grows 8-12' tall and 4-6' wide. The upright habit is perfect for a small tree.
- **Hardiness:** Zone 7-9; Multi-stemmed large shrub/ small tree.
- **Foliage:** Deciduous. Dark burgundy leaves provide a nice contrast.
- **Flowers:** White blossoms throughout the summer and into late October. Flowers on new growth; prune in late winter
