

# Magnolia Teddy Bear

**A beautiful specimen tree for the collector !**

## ***Magnolia grandiflora* 'Southern Charm' / 'Teddy Bear'**

- **Use:** This remarkable Southern Magnolia looks like no other, thanks to its unusual, very attractive foliage. Instead of the usual oblong, slightly re-curved leaves, it has rounded, cupped foliage held very densely. This gives it a "furry" teddy bear look you will love! The foliage is very showy--a shiny, rich dark green--keeping this tree fascinating year-round. It's easy to grow and quite tolerant of heat and drought, thriving even in semi-tropical climates. What a perfect specimen for the front yard, or perimeter planting in back!
- **Exposure/Soil:** Thrives in any light from full sun to shade, and tolerates just about any well-drained garden soil. Enjoy this one-of-a-kind beauty!
- **Growth:** After about 5 years it will have reached 6 to 8 feet high, slowly reaching its full, majestic size. Grows 20' tall and 12' wide in maturity.
- **Hardiness:** 6-10 Tree.
- **Foliage:** Evergreen. Rounded, cupped leaves held densely gives this tree its teddy bear appeal!
- **Flower:** Blooms in summer with the white, cup-shaped fragrant flowers, followed by interesting rusty candle-like seed structures. Blooms are 6 to 8 inches across!
