

Silver Mist Sweetbay Magnolia

Showy silver-backed leaves
Fully growth habit
Displays an absolute conical shape
Compact growth habit
Profuse bloomer from May until August
Host plant for the Eastern Tiger Swallowtail

Magnolia virginiana 'Silver Mist'

- **Use:** The Silver Mist™ gets its name from its distinct silver-backed leaves that are extremely showy on a windy day. Not only are the underside of the leaves spectacular, but the discovery of the tree nearly three years ago also brings about a tree that has a much fuller growth habit and displays an absolute conical shape. It has a compact growth habit present on both the branches and with leaves. Another feature of this Magnolia that separates it from other. Is that it is a profuse bloomer from May until August. Native.
- **Exposure/Soil:** Prefers full sun or part shade in any humus-rich well-drained soil.
- **Growth:** Moderate growing to 25 to 60 ft. tall and wide.
- **Hardiness:** Zone 5-10 Tree.
- **Foliage:** Evergreen. Dark, thick glossy green leaves with white undersides.
- **Flower:** Two-three inch-wide, lemon-scented creamy flowers grace the plant in late spring and sporadically through the summer. The fragrant blooms contribute significantly to the plants appeal.
