

Loblolly Pine Tree

Pinus taeda 'Loblolly'

- **Use:** Loblolly Pine is a North American native. This extremely fast-growing pine is pyramidal when young making it ideal for screening but loses its lower limbs as it grows older becoming a tall, stately specimen, windbreak, or dappled-shade tree.
- **Exposure/Soil:** Full/part sun.
- **Growth:** From 30 to 50 feet tall or more with a 30-foot spread.
- **Hardiness:** 5-9; tree
- **Foliage:** Evergreen, fragrant foliage.
- **Fruit:** The often-paired cones are three to six inches long, red/brown.
