

# Crimson Cascade Weeping Peach

Plant this unique tree somewhere it can be seen and enjoyed in your garden. The small size and stature make it perfect for small garden spaces or very large containers.

## *Prunus persica* 'Crimson Cascade'

- **Use:** The beauty bursts into early spring with double red-pink flowers on sweeping branches. Foliage shifts from reddish-purple to gold in fall, giving you a dynamic display from season to season. This leaves the weeping branches to sway alongside the trunk of the tree to ground level with grace. This ornamental tree does not produce edible fruit and rarely has pest or disease issues.
- **Exposure/Soil:** Full sun (preferred) to light afternoon shade. Soil should be well-drained. Acidic soil is preferred, though it can tolerate a wide variety of soils. They are not drought-tolerant, so proper watering is a must.
- **Growth:** Grows up to 10-12 feet tall and 8-10 feet wide at mature size. +derate growth rate and stay small making them perfect for smaller spaces.
- **Hardiness:** Zone 5-9; Tree
- **Foliage:** Deciduous. Leaves emerge with a reddish-purple tint from spring to summer and turn a golden yellow or greenish in the fall to produce some beautiful fall colors. In our warmer climate, the leaves may begin turning green by late summer.
- **Flower:** Fragrant, vibrant, crimson-red, and showy flowers in spring. Although humans will find the fruit unpalatable, local birds and pollinators actively enjoy them. While the tree does bear small fuzzy stone fruits, they are grown strictly for ornamental display rather than harvesting or cooking.
