

# Thuja Green Giant

## *Thuja 'Green Giant'*

- **Use:** Used as a natural screen to block out the neighbors. More disease resistant than Leyland Cypress. Also useful as a standalone specimen plant in the garden.
- **Exposure/Soil:** Full/part sun; well-draining soil. Water may not puddle around plant, and appreciates slow release fertilizer twice a year. Water if it hasn't rained in 7-10 days first 2 years. Must amend the soil if you have red clay! We recommend our **Pro Mix Soil!**
- **Growth:** Will grow from 3 to 5 feet per year and will eventually grow to 50 feet or more with a fairly narrow spread of 12-15'.
- **Hardiness:** 5-8; shrub
- **Foliage:** The color is a deep lustrous green and is pleasantly fragrant. Evergreen.
- **Flowers:** Not known for flowers.

**This hardy, fast growing, conifer makes a perfect privacy screen in just a few short years.**
