

# Red Sister Hawaiian Ti Plant

## ***Cordyline terminalis* 'Red Sister'**

- **Use:** Ti plants are such popular ornamental foliage plants, grown for their spectacular colours and leaf shapes. They are highly sought by gardeners and landscapers alike for their intense and vivid colours, especially the fluorescent pinks, maroon and reds that sparkle amidst a sea of greens or in a mix-crowd!
- **Exposure/Soil:** Bright light or nearly full sun (not direct or scorching sunshine) is best to maintain strong foliage coloration and vigorous growth indoors. Tolerates low-light to shade, but leaf variegation can be affected and become a tad dull due to reduction in light intensity. Make sure you don't have chlorine in your water or use filtered water. Prefers high humidity and high temperatures as well. Indoors, mist several times a week to provide added humidity or place in the shower once a month.
- **Growth:** Can grow 3' tall and 3' wide.
- **Hardiness:** Zone 9-11 Houseplant, Annual. Bring inside in winter.
- **Foliage:** Hot pink or red streaked leaves.
- **Flower:** Not known for flowers.

**Very easy to grow houseplant or annual to put in your shade planters. Adds a tropical flair to your home.**
