

# California Daisy

## *Euryops pectinatus* 'Viridis'

- **Use:** An extended flowering season makes this one of the most popular evergreen shrubs. Bright yellow daisy-like blooms contrast with deep green leaves. Great colorful accent, super choice for containers.
- **Exposure/Soil:** Thrives in full sun and well drained soil. Do not plant in red clay or they will rot.
- **Growth:** Grows quickly to 3-4' tall depending on the site. In S Ga and Florida they could grow up to 10' as they do not go dormant.
- **Hardiness: Zone 8/9-10;** Annual or Tender Perennial depending on the site.
- **Foliage:** Deciduous. Lacy, green leaves.
- **Flowers:** Will continue to bloom spring to summer with a profusion of yellow daisies..
