

Kimberly Queen Fern

Loves full sun
or shade and
doesn't shed
leaves!

Nephrolepis oblitterata

- **Use:** Everybody loves the Kimberly Queen Fern for its strength and hardiness!
- **Exposure/Soil: Full sun-shade.** Water regularly, when top 3 in. of soil is dry. Use slow release fertilizer for best results. Ferns love humidity. Just be sure to water in the mornings if possible. Water under the leaves as they hate being watered in the center of the plant.
- **Growth:** Will continue to grow 3-4' tall and wide or more.
- **Hardiness:** 9-11, annual, houseplant
- **Foliage:** Long fronds of deep green
- **Flower:** No flowers.
