

White Oleander

Loves the heat and very drought tolerant!

Nerium oleander 'Alba'

- **Use:** It is drought, heat, salt, wind, and pollution tolerant and is often seen growing where other plants won't such as highway medians. The perfect plant for that hot patio or by the pool.
- **Exposure/Soil:** Full sun or at least 5-6 hours of afternoon sun. Water regularly, when top 3 in. of soil is dry. Use slow release fertilizer for best results. Drought tolerant once established
- **Growth:** Grows 4-6 feet tall in one season
- **Hardiness:** 7b-11, tender perennial, Protect from temperatures below 40 degrees with a heavy layer of mulch around the plant in the winter, but remove the winter in late spring. May come back in a sheltered area, but may want to bring inside in winter.
- **Foliage:** Deciduous thin leaves are drought tolerant.
- **Flower:** Flowers are spectacular and bloom profusely throughout the summer.
- **All parts of the plant are highly poisonous if eaten!**
