

Bees Jubilee Clematis

Clematis 'Bees Jubilee'

- **Use:** For beautiful colors, extravagance of blooms, and graceful habit, nothing compares with Clematis, the queen of the flowering vines. Whether used on posts or fences, clambering through shrubs and trees, or following wire frames in borders, they will enrich the landscape.
- **Exposure/Soil:** Full sun–shade (not deep shade); Water regularly, when top 3” of soil is dry. Prefers to have its roots shaded and its flowers in the sun in the South.. Use slow release fertilizer twice a year. Once established needs only occasional water.
- **Growth:** Fast grower to 8 feet long, but still compact enough to be grown in a container. Pruning Type 2 - In this group all first flowering comes from last season's ripening stems. In early Spring watch for swelling leaf buds beginning to show. Cut all dead material off above these swelling buds. Be sure all growth is tied to the trellis, etc. at this time. Do not tie too tightly, so growth will not be hampered or cracked.
- **Hardiness:** 3-9; Perennial, Vine
- **Foliage:** Deciduous. Delicate green foliage grows quickly. Compact grower.
- **Flowers:** Loads of 6–8” mauve-pink flowers with deep pink bars put on a powerful display in early summer, with repeat bloom later in the season.

A must
have vine
in the garden for
beginner
Gardeners.
