

# Flirty Girl Hydrangea Vine

## Top reasons to grow Flirty Girl™

- Grows quickly and produces flowers readily.
- Elegant creamy white blooms appear in abundance.
- Flowers are lightly fragrant.

## **Schizophragma hydrangeoides 'Flirty Girl'**

- **Use:** If you've grown a hydrangea vine before, perhaps it took a bit longer to bloom than you had expected. With Flirty Girl™ that worry is a thing of the past! You'll get an abundance of lightly fragrant, creamy blooms in no time at all. New growth emerges purple, which adds to its charm in the landscape.
- **Exposure/Soil:** Plant in part shade with afternoon shade from our hot summer sun preferred. Blooms on old wood. Soil pH does not affect flower color. Best planted on a North facing wall.
- **Growth:** Slow growing to 40-50 feet high. Plant 6-9' apart.
- **Hardiness:** Zone 5-9 Vine
- **Foliage:** Deciduous. Coarsely toothed, glossy, dark-blue-green leaves. Young purple shoots add to its interest.
- **Flower:** Large, flat-topped, lace cap hydrangea-like clusters (8-10" across) of creamy white flowers which bloom in summer.
